CompTIA Network+ training: Certification (N10-008)

ALL-IN-ONE: EXAMINATION INCLUDED IN PRICE

3 days (21 hours)

Presentation

Our CompTIA Network+® training will effectively prepare you to pass the SY0-701 certification, one of the best certifications for proving your networking skills on any platform. This training will prepare you for the day-to-day tasks of [network administrators](#) and cybersecurity analysts.

CompTIA Network+ certification preparation is extremely popular, as it covers general concepts applicable to any network or operating system, rather than focusing on a single manufacturer.

Our course program covers basic network concepts, management of essential technologies and devices, security and network problem solving. You'll also learn how to implement functional networks and manage the devices essential for their smooth operation.

Our training begins with an introduction to the fundamental concepts of computer networks. This review of the basics is suitable for beginner administrators and analysts, but also for more experienced profiles who will be able to review the basics before taking the certification exam.

Companies concerned

This course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire enabling us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives with regard to the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
