Comptia Security+© : Certification preparation (SY0-701)

ALL-IN-ONE: EXAMINATION INCLUDED IN PRICE

5 days (35 hours)

Presentation

Our Comptia Security+© training course will prepare you effectively for certification. An essential qualification to prove your [fundamental skills](#) in IT security.

Our syllabus follows the main parts of the test: threats, attacks and vulnerabilities, architecture, implementation, incident response and compliance.

Our training begins with a presentation of the different types of attack and their associated risks, followed by an introduction to the fundamental concepts of cybersecurity, including cryptography and the cloud. We'll also help you choose the right services for your organization.

Finally, we'll teach you key concepts in terms of incident response, forensic analysis, the importance of governance and compliance with [security standards](#).

Objectives

- Get ready for the Comptia Security+© exam
- Understand the different types of threats and assess the risks associated with vulnerabilities
- Know the basic principles of cybersecurity
- Implement incident response measures
- Understanding and applying safety standards

Target audience

- System administrator
- Safety engineer
- Cybersecurity Analyst
- Network administrator

Prerequisites

- 2 years' experience in system/security administration recommended
- Solid knowledge of IT security
- Networking and administration skills for Windows-based TCP/IP networks
- Knowledge of other operating systems, such as OS X, Unix or Linux
- Comptia Network+™ certification is recommended

Note: Ambient IT is not the owner of Comptia Certifications®, this certification belongs to Comptia, Inc.

Comptia Security+™ Certification Preparation Program

Threats, attacks and vulnerabilities

- Understanding the different types of threats
- Know the risks according to the type of vulnerability
- Social Engineering
- Indicators for anticipating attacks
 - Within applications
 - Within the network
- Pentesting techniques
- Integrate these threats into an analysis report

Architecture

- IT security concepts
- Virtualization and cloud computing
- Securing application development
- Authentication and authorization
- Understanding resilience
- Safety on embedded and specialized systems
- Physical security controls
- Cryptography concepts

Implementation

- Secure protocols
- Hosting security
- Application security
- Network security
- Wireless security configuration
- Mobile safety
- Protecting the Cloud
- Implementing IAM
- Authentication and authorization solutions
- Setting up a public key

Operations and incident response

- How do you choose the right tools?
- Rules and procedures for responding to incidents
- Choosing the right data sources for your investigation
- Mitigation techniques
- Understanding forensic analysis

Governance, risk and compliance

- The different types of control
- Current safety standards
- The importance of security policies within an organization
- Risk management
- The concepts of confidentiality and sensitive data

Strategy and methods for exam success Mock

exam

FAQ - QUESTIONS / ANSWERS

What language is Comptia Security+ taught in? The training is in French.

Is the exam included in the course price?

Yes, the price of certification is included in the cost of training (\$404 for information purposes). You can take the exam at the end of the session.

How does the Comptia Security+ certification exam work?

The exam consists of a performance-based MCQ of up to **90 questions**.

It is taken online at an approved Pearson Vue test center. The exam

lasts **90 minutes** and is available in English and French.

To pass this exam, you need to score at least 750 points, on a scale from 100 to 900 points.

Companies concerned

This training course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
