Logpoint Certified Administrator training

ALL-IN-ONE: EXAMINATION INCLUDED IN PRICE

2 days (14 hours)

Presentation

Our LogPoint certified administrator training course will enable you to become fully operational with LogPoint products and prove your skills with an ad hoc certification. LogPoint tools are based on a [holistic approach to cybersecurity](#), and the training will be delivered by a SOAR expert.

The training will familiarize you with LogPoint basics such as license management and appliance installation.

Our program will also cover the configuration of user profiles, the deployment of a LogPoint solution, backup and restore management, and an introduction to the SOAR solution.

This training course will take place [on Logpoint SIEM version 7.3.0](#).

FAQ - QUESTIONS / ANSWERS

What language is LogPoint certified administrator training taught in? The training is in

French.

Is the exam included in the course price?

Yes, the price of certification is included in the cost of training. You can take the exam at the end of the session.

How does the LogPoint certified administrator exam work? The exam consists of a

15-question performance-based MCQ administered online.

The exam lasts **45 minutes** and is available in English and French.

To pass this exam, a minimum score of 70% is required. It is possible to retake the exam 3 times.

Companies concerned

This course is aimed at both individuals and companies, large or small,

wishing to train its teams in a new advanced IT technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
