Microsoft MS-900 Certification Training

1 day (7 hours)

Presentation

Our MS-900 certification course will give you the essential grounding you need to master the Microsoft environment. It's an excellent first certification to take, whether you're an occasional user of Microsoft products or want to specialize in the use of this ecosystem.

During this training course, you will become familiar with all the different technologies used by Microsoft, but in particular Microsoft 365.

Our program includes a complete description of Cloud concepts, the different applications and all Microsoft 365 services. It also includes a section on security, compliance, confidentiality and trust in Microsoft 365, and a description of pricing, licensing and support for Microsoft 365.

As with all our training courses, we will be using the latest versions of the tools available, in particular [Microsoft 365 2411](#).

Objectives

- Pass MS-900 certification
- Master Microsoft cloud concepts
- Mastering security in Microsoft 365

- GDAP in Microsoft
- Identity and access management
- MFA and SSPR implementation
- Conditional access and Microsoft Defender
- Common types of threats

Pricing and Microsoft Licenses

- Pricing for cloud services
- License management
- Using Microsoft support
- Service level agreements (SLAs)

Companies concerned

This course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
