Palo Alto Panorama Training

(EDU-221)

2 days (14 hours)

Presentation

Palo Alto Panorama™ is useful in network security management, simplifying management tasks while providing comprehensive controls and in-depth visibility of network-wide traffic and security threats.

The 2-day Palo Alto Networks® Panorama course (EDU-220), led by a certified instructor, will enable you to configure and manage the Panorama "next generation" management server, experiment with the configuration of templates and device groups, experiment with administration, log retrieval, log management and reporting, familiarize yourself with Panorama's high availability and learn about new features such as Panorama in the public cloud, the Logging Service, and GlobalProtect Cloud.

For this and all other training courses, we'll be using the latest version of the tool, Palo Alto 10.1.

Objectives

- Configure and manage a Palo Alto Networks® Panorama management server
- understand the role of the Panorama management server in managing and securing their entire network
- Know how to use combined reports to get a holistic view of the entire Palo Alto Networks ® new-generation firewalls.

Target audience

Security Engineers, Security Analysts, Network Professionals, Systems Admins,

Support engineers

Prerequisites

- Students must have taken the Firewall 10 course on Firewall Essentials (EDU-210), have a good understanding of how to configure Palo Alto Networks next-generation firewalls.
- Basic network administration skills, including IP addressing and routing, are essential. also required

Palo Alto Panorama training program

- Overview
- Initial configuration
- Templates
- Device groups
- Administration
- Centralized log recovery
- Journals and reports
- Panorama high availability

Companies concerned

This course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
