PMP® 2022 Training with Certification

5 days (35 hours)

Presentation

PMP® certification training prepares you to pass the written exam, consisting of questions (MCQs) concerning project management and based on knowledge of the Exam Content Outline (ECO), mainly PMBOK V6, Agile Practice Guide and other key resources cited by PMI.

An integral part of the prerequisites required to submit an eligibility application, this PMP® certification training course enables anyone wishing to prepare for PMP® certification under the new 2022 program to master the PMI philosophy, while acquiring the techniques needed to successfully complete projects using the classic, hybrid or agile method.

Training led by a PMI-accredited trainer in line with its new program from 2022.

Objectives

- Understand the structure and terminology used in the Project Management Body of Knowledge (PMBOK)
- Showcase knowledge and domains (people, processes and business environment) in project management, generally recognized as good practice
- Understand the tasks and catalysts involved in each of the above areas
- Describe the project management life cycle and associated processes
- Present the professional responsibilities expected of a practitioner
- Prepare for the PMP® exam with a question base inspired by real-life questions

Target audience

- Project Manager

- Project managers
- Member of project teams
- Sponsors
- Managers

Prerequisites

There are no prerequisites for this course. It is only preferable if the participant is familiar with project management or has worked in a project environment.

Note: Ambient IT is not the owner of PMP®, this certification belongs to Project Management Institute®, Inc.

- Passing the PMP® exam after training :
 - This 180-question PMP® certification exam consists of a combination of multiple-choice, multiple-response and reactive questions.
 - total exam time: 230 minutes.

Companies concerned

This training course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire is used to check that skills have been correctly acquired.

Sanction

A certificate will be issued to each trainee who completes the course.
