Professional Scrum Product Owner 2 training: PSPO II certification

ALL-IN-ONE: EXAMINATION INCLUDED IN PRICE

2 days (14 hours)

Presentation

Have you achieved PSPO 1 certification, and would like to pass PSPO 2? Would you like to improve your skills and learn more about the advanced concepts of the Scrum method? This training course will enable you to become an expert product owner when it comes to implementing Scrum.

This PSPO II training course will enable you to deepen your knowledge of how to implement the Scrum method, the most widely used agile method.

This course is accompanied by exam preparation, so you'll know how to answer the questions, and you'll discover the automatism and tactics you need to complete your assessment more quickly.

At the end of this preparation, you can take the PSPO II certification free of charge.

Objectives

- Understand the advanced concepts of the Scrum method
- Know how to implement the Scrum method in complex situations
- Be ready to pass the PSPO 2 exam

Companies concerned

This training course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

Teaching methods

Practical training: 60% Practical, 40% Theory. Training material distributed in

to all participants.

Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

Sanction

A certificate will be issued to each trainee who completes the course.
