# Professional Scrum Product Owner 3 training (PSPO III)

2 days (14 hours)

## Presentation

Our training course will prepare you for the Professional Product Owner III (PSPO III) exam issued by the official Scrum.org organization. The PSPO III certification is an opportunity to hone your project management skills. It is the final level of certification for the Product Owner profession. Advanced Scrum skills are synonymous with greater productivity and customer satisfaction. These benefits are achieved through a deep understanding of product vision, stakeholder engagement and product backlog management. By the end of this PSPO 3 training course, you'll know how to effectively apply the Product Owner Scrum role, artifacts and events. Thanks to our Professional Scrum Product Owner III course, you'll be able to fill in and manage product backlogs, use just-in-time specifications, plan and manage releases, improve transparency and reduce technical debt.

## Objectives

- Deep understanding of the important role of the Product Owner in delivering valuable products
- Understanding of how the product vision, stakeholder engagement and the product backlog to maximize value creation
- Master the role of Product Owner in your organization and within a project

## Target audience

- Product Owner
- Scrum Master
- Product managers
- All stakeholders in an Agile project

## Prerequisites

- Have completed our PSPO II training course
- If you're new to the Scrum framework, we recommend our PSPO training course.

- Manage multiple teams
- The Nexus frame

## PSPO 3 exam preparation

- Case studies and best practices
- Theoretical questions
- Argumentative questions
- Practical exercises
- Mock exam with annotated correction

# Further information

# Companies concerned

This training course is aimed at both individuals and companies, large or small, wishing to train their teams in a new advanced computer technology, or to acquire specific business knowledge or modern methods.

# Positioning on entry to training

Positioning at the start of training complies with Qualiopi quality criteria. As soon as registration is finalized, the learner receives a self-assessment questionnaire which enables us to assess his or her estimated level of proficiency in different types of technology, as well as his or her expectations and personal objectives for the training to come, within the limits imposed by the selected format. This questionnaire also enables us to anticipate any connection or security difficulties within the company (intra-company or virtual classroom) which could be problematic for the follow-up and smooth running of the training session.

# Teaching methods

Practical course: 60% Practical, 40% Theory. Training material distributed in digital format to all participants.

# Organization

The course alternates theoretical input from the trainer, supported by examples, with brainstorming sessions and group work.

## Validation

At the end of the session, a multiple-choice questionnaire verifies the correct acquisition of skills.

## Sanction

A certificate will be issued to each trainee who completes the course.
